EDUCATION

Maryville University St Louis, MO
Bachelor of Science in Actuarial Science ***2021 -- 2025***

ACTUARIAL EXAMS

Exam FM	**Financial Mathematics**	**Passed Oct. 2024**
Exam P	**Probability**	**Passed Mar. 2025**
Exam SRM	**Statistics for Risk Modeling**	**Sitting May. 2026**

RELEVANT EXPERIENCE

Claims Triage & Reserving Engine ***Jan 2026 – Present***
Independent Automation Project (n8n, OpenAI API, PostgreSQL, Docker, R Shiny) *St Louis, MO*

- Architected an event-driven FNOL (First Notice of Loss) pipeline to eliminate manual data entry latency; system ingests unstructured claim emails via webhooks.
- Integrated LLMs (GPT-4o) to analyze damage descriptions, assigning an actuarial severity score (1-10) and calculating initial case reserves based on historical logic.
- Deployed a self-hosted PostgreSQL database via Docker to persist structured claims data, feeding a real-time R Shiny dashboard to monitor portfolio reserve exposure.

Actuarial Experience Study — Lapse MVP (Python) ***2025***
Independent Actuarial Project *St Louis, MO*

- Conducted actuarial experience study, calculated crude and credibility-blended lapse rates for insurance blocks using Python and Excel
- Generated plots with 95% confidence intervals; authored QA documentation, SOPs, and structured data dictionaries for audit readiness
- Published reproducible codebase supporting future actuarial audits and team onboarding

Lead Math Peer Tutor ***Aug. 2024 -- May 2025***
Maryville University *St Louis, MO*

- Delivered ~300 tutoring sessions for calculus, statistics, actuarial exam prep; helped cohort achieve 100% SOA Exam P pass rate
- Authored onboarding guides and SOPs, trained 7 tutors, reducing ramp-up time by 80%

Forest Cover Prediction Model (PySpark MLlib) ***2024***
Maryville University *St Louis, MO*

- Trained and tuned ML classifiers on 580,000+ environmental records, achieving 92% accuracy with 5-fold cross-validation
- Implemented feature engineering, diagnostics, and ranking to optimize model performance for data-driven decision making

Annual Fund Communications Assistant ***Jan. 2022 -- May 2023***
Maryville University *St Louis, MO*

- Analyzed 3,000+ donor records (Salesforce, Excel) to uncover donor retention patterns and inform outreach strategy
- Built segmented outreach lists and delivered weekly KPI reports; boosted digital response rates by 150%

TECHNICAL SKILLS

- **Actuarial methods:** Experience studies (exposure, crude rates, credibility), lapse/persistency analysis
- **Modeling/analysis:** GLM/logistic regression, cross-validation, hypothesis testing, confidence intervals, exploratory data analysis
- **Programming:** Python (pandas, scikit-learn), R, SQL
- **Data & reporting:** Excel (PivotTables, VBA), Tableau, R Shiny
- **Automation**:n8n (Workflow orchestration), REST API, Docker (Self-hosting), Webhooks, Google Workspace automations
- **Data quality:** Cleaning/wrangling, feature engineering, validation checks, QA documentation

LEADERSHIP & ACTIVITIES

- Vice President, Actuarial Science Club (mentored 14 students, led events)
- Men's Rugby Captain
- CONNECT Multicultural Student Org Executive
